NEO battery backup for security installations

NEO is normally used in facilities where the requirements are higher regarding greater flexibility, more alarm functions, longer backup operating times or when the battery backup needs to handle higher loads. The NEO series offers controlled charging (intelligent charging), which means that when the batteries are fully charged, they will be electronically disconnected for standby mode for up to 20 days or when the batteries have reached 26.7 V (24 V). By discharging the batteries and recharging them continuously (instead of never using them), the system extends the life of the battery by up to 50%. The batteries automatically connect in less than 50 microseconds when needed.

- Battery backup with more alarm functions
- Controlled charging
- Can be supplemented with several optional cards
- Can be used with battery box

Flexibility

NEO FLX S can have an extra battery box. NEO FLX M and NEO FLX L with 1-4 extra battery boxes. NEO FLX M and NEO FLX L with battery shelves in 19" rack *. * The battery boxes and shelves are connected via a 9-pin connector. The battery box has room for up to 2 pcs. 45 Ah batteries per battery box. Battery shelves have room for 2 pcs. 45 Ah batteries (Medium) and up to 2 pcs. 150 Ah batteries (Large) per each battery shelf.

Area of use

NEO is mostly used for: Access systems, burglar alarm systems, integrated security systems and locking systems

Fixed installation

The product is intended for fixed installation. The battery backup must be installed by a qualified installer.
