

## PRODUCTION ANNOUNCEMENT: NEW IMPROVED OPTIONAL HOLDER

**Date:** 2026-02-18

**Applies from:** First quarter 2026

### MAIN PURPOSE & CHANGES

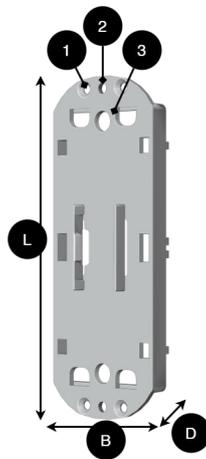

Milletechnik introduces a new optional card holder with a focus on stability and space saving.

**Material:** Modified material for increased rigidity

**Design:** The depth has been reduced to save space in the enclosure.

**Holes:** Three new screw holes per short side for more stable mounting.

**DIN rail:** The option of DIN rail mounting has been removed by default.

Designation	Dimensions	
L, B, H	Length x Width x Depth	107 x 40 x 13 mm
1	Hole on short side, outer x 2	3 mm
2	Holes on short side, middle	3.4mm
3	Holes in on short side, inside	3.4mm

### BACKWARD COMPATIBILITY & SERVICE

- **No service action:** Existing devices with the previous version do not need to be repaired or replaced.
- **Fit:** The holder fits in many<sup>1</sup> products that have traces in the housing.
- **Circuit Boards:** The location and dimensions of the circuit board itself are identical to the previous version.

**Do you need DIN rail mount?** Contact support to order a specific replacement holder as this is no longer included as standard

<sup>1</sup>For products in FLX M and FLX L enclosures, this is estimated to be compatible with products that will be manufactured in late Q2, early Q3 2026. This is due to adjustments in a plate that cannot be carried out before then.

## WHEN THE CHANGE APPLIES FROM

The change will take effect in the first quarter of 2026. There will be several different versions of optional holders available at the same time, see also
