

PRODUCTION ANNOUNCEMENT

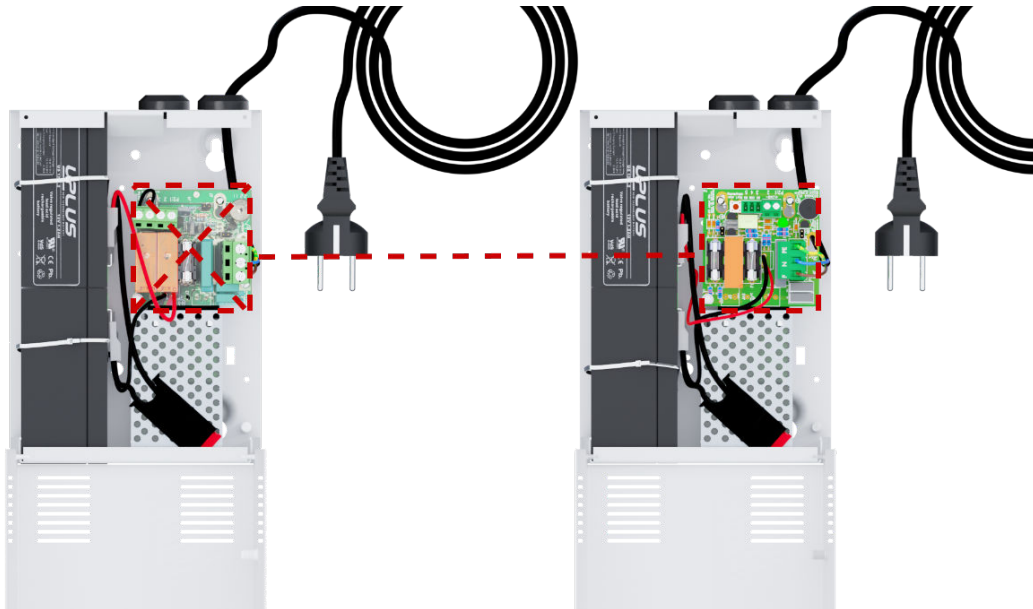

Milletechnik launches a new ECO 24V 1A Mini. The product is a compact 24 V battery backup for small security applications where easy installation and backup operation are required. At the same time, the ECO 12V 2A Mini is launched to complement the range with a demanded 12 V variant of the product.

The purpose of the change is to update the product with a new design, clearer alarm and indication functions as well as a clearer delineation of the product's scope of use.

The ECO 24V 1A Mini is introduced as a new product, it replaces the previous ECO Mini and has a new part number and a new e-number.

ECO mini

Denomination	Item No.	E-number	Status
ECO 24V 1A Mini	MI01C10324P010B01	52-137-46	Expires
ECO 24V 1A Mini	MI01C10524P010B01	52 137 97	New 24 V Product
ECO 12V 2A Mini	MI01C10512P020B01	52 137 96	New 12 V Product

Differences between versions

The new ECO 24V 1A Mini has updated design on the motherboard and changed functions compared to the previous ECO Mini.

The main difference is that the function of external load disconnection via switches is not present in the new product.

Therefore, customers who have previously used external load disconnection need to check whether the new ECO 24V 1A Mini fits the current installation. Need the function be referred to [EN54 24V 1.5A MX S](#).

ECO mini

Function	New ECO 24V 1A Mini	New ECO 12V 2A Mini	Outgoing ECO 24V 1A Mini
Button for start in battery operation without mains voltage	✓	✓	x
The Sums	✓	✓	x
Potential-free alarm output, alarm via NC/COM/NO relay output	✓	✓	x
External load disconnect switch	x	x	✓

What does not change

Price, delivery time and warranty period are unchanged.

ECO 24V 1A Mini remains a compact 24V battery backup for smaller loads, two 1.2Ah battery included.

The product is still intended for applications where there is a need for backup operation, basic alarm function and easy installation.

The product is still intended for use in, for example, smaller access systems and burglar alarms.

WHEN THE CHANGE APPLIES FROM

The new ECO 24V 1A Mini is valid from 2026-07-01. Since the product can be stored, there may be previous versions at the supplier/distributor stage

previous ECO Mini is gradually being replaced by the new product. Returns with reference to the product exchange will not be accepted. Any complaints will be handled in accordance with standard complaint terms and conditions

For new orders, part number MI01C10324P010B01 and E-number 52 137 46 shall be used.
